

Paul Smal

Experience of projects development in telecom, computer networks and logistics. Enterprise and startups. Area of interests are concurrency, parallelism, distributed applications, blockchain, graphs, open source, innovative startups and entrepreneurship.

I'm looking for remote work that intersects with my interests. I withdrew from university in 2007 from computer science faculty for work, later obtained marketing degree.

SKILLS

Linux/NixOS, **Git**, **SSH**, **Vim**, **Spacemacs** are my daily drivers.

Writing web services in **Elixir** and **Go**. I'd love to use Rust, Python or anything else.

Building UI with **JS**, **React**, **React Native**, **Vue**, **HTML**, **CSS**.

Can drop into "**devops**" role to automate and containerize my build workflow.

I spent 5 years in **Java** world where met **Scala**. Worked with **PHP**, **C** and **Objective-C**.

Familiar with telecom and computer networks administration. **RTP**, **WebRTC**, **SIP** protocols.

Used **SQL**, **KV** and **Document** dbs in prod. Familiar with **Graph** dbs.

Leading dev teams, remote teams coordination, softer management strategies.

Building MVP, business analytics, customer communications.
