SOFTWARE ENGINEERING / DESIGN / ENTREPRENEURSHIP

I love building cool stuff, solving hard problems and I think design sells. Most recently worked in a startups but have experience working in enterprise companies. Projects in various domains like telecom, computer networks, logistics, communications. I like open source community, working with graphics, startups and looking for inspiring work that intersects with my interests.

EMPLOYMENT TIMELINE

TalkJS | Software developer

Backend development
Performance analysis
React Native development
Customer Support

Sigma Software | Startup enthusiast

Attracted cryptocurrency startup as a client.
Developer on demand

Multimedia Nordic | Co-founder

System architecture and design
Engineers and designers team management
Customer delivery
Business development

NetCracker · JPMorganChase | Technical Project Manager

Implementation team management
Main contact point for all customers meetings

OdysseyLogistics & Technology Co. | Production Support Team Lead

Production issues investigation
System performance audit
Customers portal

Hewlett-Packard · Procter & Gamble | Support Engineer

RECENT PROJECTS

TalkJS Chat SDK for web applications

Elixir, Phoenix, React Native

MIKZ Marketing Influencers aggregation platform

PHP, Single Sign-On

Statsminder Chat SDK for web applications

Golang, Freeswitch, JS

TimeTed Tax automation software

Java, PostgreSQL, JS

Nora Oracle database client GUI for MacOS

Objective-C, C, Cocoa

SKILLS

Linux

As a main desktop and server OS.

Git, SSH, VIM

Main daily drivers of my workflow

Elixir, Phoenix framework

Writing backend services, database access layers, ecosystem.

JavaScript

Writing simple web and mobile frontend apps with React and React Native

HTML, CSS

Making static web pages with unsophisticated designs

Inkscape

Creating visual stuff for various purposes, like this CV

Docker

Can drop into "devops" role to automate my dev workflow

SQL, NoSQL

Mostly using PostgreSQL but worked with some non SQL dbs.

Java, Objective-C, C, PHP

I'd rather not back to this but reality is cruel

WebRTC, RTP

I'm able to read documentation about different protocols and integrations
